

Our family owned business has generations of experience providing expert boat repairs, osmosis treatments, winter boat storage and marina berths. With so many years on the water, we've learned to change with the times, embracing the latest technology and techniques for **boat repairs**, but keeping some things the same - like pride in our work

and a commitment to our customers.

Located on the western edge of Chichester Harbour we're perfectly positioned to take advantage of the natural shelter, offering calm marina berths and secure boat storage. Our team of dedicated craftsmen have the expertise and the experience to carry out all types of boat repairs - from the latest Hot Vac hull cure systems to treat osmosis - to engine, electrical and a wide range of traditional joinery.

We're happy to provide free quotations for any boat repairs required, and can give you an estimate from the boat itself or photographs for your convenience.

Take a look through our website or call us for more information - on 02392 463592.
